

CURRICULUM VITAE

PERSONAL INFORMATION

Name

Giacomo Bertoldi

PROFESSIONAL RECORD

January 2008 – Present

- Main activities and responsibilities

Senior researcher at Institute for the Alpine Environment, EURAC, Bolzano/Bozen, Italy.

Analysis of the impacts of land cover and climate changes on the water cycle and ecosystem services in Alpine environments. Ecohydrological modeling of land-surface interactions.

August 2005 – December 2007

- Main activities and responsibilities

Research associate at Duke University, USA, Department of Civil and Environmental Engineering.

Development and implementation of a framework for merging remotely sensed land surface data into a Large Eddy Simulation (LES) model to account for effects of land cover variability on regional surface fluxes. The research was supported by NASA in collaboration with the USDA-ARS Hydrology and Remote Sensing Laboratory of Beltsville, MD.

August 2004 – August 2005

- Main activities and responsibilities

Post-doctoral fellowship at the University of Trento, Italy, Department of Civil and Environmental Engineering.

Development and application of the distributed hydrological model GEOTOP for the European project AQUATERRA (VI EU framework), on integrated modeling at watershed and regional scale in the context of land-use and climate change.

November 2000 – July 2004

- Main activities and responsibilities

Ph. D. candidate at the University of Trento, Italy, Department of Civil and Environmental Engineering.

Research activity has been mainly directed to model the hydrological cycle and land-surface processes in small basins. A numerical model, called GEOTOP, has been developed.

The GEOTOP model is a distributed hydrological model, which aims at estimating in an integrated way the catchment water budget and the spatial distribution of numerous hydro-meteorological variables like soil moisture, surface temperature, radiation fluxes and heat fluxes into the soil, surface and subsurface water flows, water table depth and water potential.

The model can be coupled with remote sensing observation and forced by regional climate model outputs for local scale scenarios evaluation.

The code and documentation on the GEOTOP model is available on line at the web pages:

EDUCATION

20 November 2013

Italian national scientific qualification as Associate Professor – sector 08/A1 – Hydraulics, hydrology, hydraulic and marine construction (as defined in D.D. 222 of 20/07/2012)

02 July 2004

- Dissertation title

Ph.D. in Environmental Engineering, University of Trento, Italy. Specialization: Hydrology

"The water and energy balance at basin scale: a distributed modeling approach", supervisor prof. Riccardo Righini (University of Trento, Italy).

18 October 2000

M.S. in Environmental Engineering University of Trento, Italy, full marks 110/100 with honors.

<ul style="list-style-type: none"> • Dissertation title <p>1993</p>	<p>"A study of the soil-atmosphere interactions at basin scale, using a distributed model", supervisor prof. Riccardo Rigon.</p> <p>School leaving certificate at the Liceo Scientifico "G. Galilei" (Trento), with full marks.</p>
<p>LANGUAGES</p>	<p>Italian (native language), English (fluent), German (good – B2). Spanish (basic)</p>

<p>AREA OF EXPERTISE AND RESEARCH INTERESTS</p>	<ul style="list-style-type: none"> - Hydrology: distributed numerical modeling, land surface interactions, evaporation estimation, catchment hydrology, flood forecasting and management, snow processes, landslides and debris flows. - Ecology: eco – hydrology, dynamic vegetation models. - Remote sensing: use of remote sensing data for distributed eco – hydrological models. - Hydrometeorology: atmospheric boundary layer physics, computational fluid dynamic, turbulence modeling. - Geomorphology: Geographic Information Systems (GIS), morphological analyses, catchments morphology.
<p>COMPUTING SKILLS</p>	<ul style="list-style-type: none"> - Programming languages: C, Fortran, Linux bash. - GIS systems: GRASS, ArcGis. - Software: Matlab, Mathematica, Autocad, Office.
<p>ABROAD RESEARCH PERIODS</p>	<p>20 July – 20 October 2001</p> <ul style="list-style-type: none"> - Visiting Scholar at the Hydrosystem Laboratory of the University of Illinois at Urbana Champaign (USA) and at the U.S. Geological Survey of Illinois, advisors P. Kumar and T. M. Over. <p>27 August – 23 December 2003</p> <ul style="list-style-type: none"> - Education Abroad Program exchange Ph. D. student at the University of California Berkeley, Department of Earth and Planetary Science and Lawrence Berkeley National Laboratory, advisors W. E. Dietrich and N. L. Miller. <p>August 2005 – December 2007</p> <ul style="list-style-type: none"> - Research Associate at the Department of Civil and Environmental Engineering, Duke University, NC, USA.
<p>PROFESSIONAL SERVICE</p>	<ul style="list-style-type: none"> - Member of the <i>American Geophysical Union</i>, of the <i>European Geophysical Union</i>, of the <i>American Meteorological Society</i> since 2001. - Member of the Engineering Italian Union since 30/1/2001, Province of Trento, id. 2176. - Reviewer of ISI journals: <i>Agronomy and Soil</i>, <i>Biogeoscience</i>, <i>Agricultural and Forest Meteorology</i>, <i>Geoscientific Model Development</i>, <i>Water Resources Research</i>, <i>Hydrology and Earth System Sciences</i>, <i>Geophysical Research Letters</i>, <i>Journal of Geophysical Research</i>, <i>J. of Hydrology</i>, <i>J. of Hydrometeorology</i>, <i>Hydrological Sciences J.</i>, <i>Ecohydrology</i>, <i>J. of Selected Topics in Applied Earth Observations and Remote Sensing</i>, <i>Landscape Ecology</i>, <i>Remote Sensing</i>, <i>Hydrological Processes</i>, <i>Plant and Soil</i>. - Professional snow observer for avalanche risk assessment, since 1997. - Operator and assistant of artificial avalanches triggering, since 1999..
<p>FINANCED RESEARCH PROJECTS</p>	<ul style="list-style-type: none"> - "Exploitation of 10-Years Time Series of ASAR images for Monitoring of Soil Moisture Content in Mountain Areas", ESA European Space Agency, id: 14572, co-investigator, P.I. Claudia Notarnicola, EURAC, duration 2013 – 2015. - HiResAlp, "An innovative framework for the Integration of multi-source data to determine soil moisture and evapotranspiration at high resolution in Alpine regions" 1/2013 – 1/2016. Role: co P.I. and responsible of the activities of the EURAC Istituite for Alpine Environment, P.I. Claudia Notarnicola Eurac. Supported by the Provincia Autonoma di Bolzano (Italy), for the 1° bando di concorso per progetti nel campo della ricerca scientifica (Articolo 9, legge provinciale del 13 dicembre 2006, n. 14), 297'000 Euro.

- **EMERGE**, “*Retreating glaciers and emerging ecosystems in the Southern Alps, duration*” 1/2011 – 1/2014. Role: responsible of WP1: “Analyzing the physical drivers of ecosystem changes”. Stephan Zerbe, University of Bolzano. Founded by the Förderprogramm 2010 Herzog-Sellenberg- und Dr. Erich Ritter-Stiftung, Germany, 210'000 Euro.
- **HydroAlp**, “*Modelling the interaction between water cycle, vegetation and climate in Alpine environments*”, duration 3/2011 – 3/2014. Role: PI lead partner and scientific coordinator, supported by the Provincia Autonoma di Bolzano (Italy), for the 1° bando di concorso per progetti nel campo della ricerca scientifica (Articolo 9, legge provinciale del 13 dicembre 2006, n. 14), 285'568 Euro.
- **Bando post doc 2006 della Provincia Autonoma di Trento**: three year support of 140'000 Euros for the project **ISVAT** “*Modeling at local scale the water cycle and the land vegetation atmosphere interactions as function of climate change scenarios*”, to perform at the Department of Environmental Engineering of the University of Trento. Role: PI.

PUBLICATIONS PEER REVIEWED

- 2015 - Mair E., Leitinger G., Della Chiesa S., Niedrist G., Tappeiner U., Bertoldi G.: A simple method to combine snow height and meteorological observations to estimate winter precipitation at sub-daily resolution, submitted to Journal of Hydrological Sciences. Accepted July 2015.
- 2015 - Engel M., Penna D., Bertoldi G., Dell'Agnese A., Soulsby C., Comiti F., Identifying runoff contributions and mixing processes during melt-induced runoff events in a glacierized Alpine catchment. *Hydrological Processes*. Accepted Mai 2015.
- 2015 - Pasolli, L., Notarnicola, C., Bertoldi, G., Bruzzone, L., Remegaldo, R., Niedrist, G., Della Chiesa S., Tappeiner, U., Zebisch, M. (2015). Estimation of Soil Moisture in Mountain Areas Using SVR Technique Applied to Multiscale Active Radar Images at C-Band. *Selected Topics in Applied Earth Observations and Remote Sensing, IEEE Journal of*, 8(1), 262–283. doi:10.1109/JSTARS.2014.2378795
- 2014 - Penna D., Engel M., Mao L., Dell'Agnese A., Bertoldi G., Comiti F. 2014. Tracer-based analysis of spatial and temporal variation of water sources in a glacierized catchment. *Hydrology and Earth System Sciences* 8, 5271-5288, 2014. doi:10.5194/hess-18-5271-2014.
